Professional Summary

Frontend Developer with 5+ years' experience designing and leading scalable React and Next.js applications for enterprise and device-based projects. Proven expertise in frontend architecture, state management, performance optimization, accessibility, and security best practices. Adept at mentoring teams, collaborating across functions, and delivering intuitive, high-performance products at scale.

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks/Libraries: React.js, Next.js, Redux, Zustand, Zod, React Query, Material UI, Tailwind CSS, Schadcn

UI/UX Tools: Figma, Adobe XD, Sketch

Development Tools: Git, GitLab, GitHub, VS Code, Chrome DevTools, GitHub Actions

Cloud & Integration: AWS (Amplify), REST APIs, Chatbot Interfaces

Methodologies: Agile/Scrum, Performance Optimization

Design Principles: Design Thinking, Mobile-First Design, Component-Based Architecture, Web Accessibility

Professional Experience

Frontend Developer — GetMoore

Remote | Nov 2023 – Present (Freelance)

- Led frontend team delivering MVP and second release of a complex admin dashboard; improved load times by 40% via migration to Next.js, TypeScript, and Zustand.
- Designed scalable frontend architecture and reusable components for high-traffic financial dashboards.
- Applied WCAG-compliant accessibility standards, boosting accessibility scores from 75% to 95%. Collaborated cross-functionally with designers and backend developers to deliver pixel-perfect, responsive UI

Frontend Developer — Ethnos Cyber

Remote | Sep 2022 – Oct 2024 (Full-Time)

- Led development of Aquila, Africa's first indigenous mobile security testing platform, delivering responsive dashboards for vulnerability visualization.
- Owned frontend architecture for Castellum security awareness platform; implemented state management with Redux and performance tracking analytics.
- Mentored junior developers, improving code quality and team delivery speed through structured guidance. Integrated REST APIs and optimized UI for cross-device performance and security best practices.

Frontend Developer — Zealight Innovation Labs

Remote | Jul 2021 – Aug 2022 (Contract)

- Contributed to logistics platform development using React and modern JavaScript (ES6+)
- Enhanced user experience through intuitive interfaces and responsive design
- Collaborated in Agile development environment with cross-functional teams

Junior Software Developer — Canary Point Corporate Services

Remote | Jan 2021 – Jun 2021 (Internship)

- Developed company website using React and Material UI following responsive design principles
- Enhanced user engagement through interactive features and performance optimization
- Launched mobile-friendly website with improved cross-browser compatibility

Key Projects

Moore Admin Dashboard

Comprehensive financial dashboard using React, TypeScript, and ApexCharts featuring real-time data processing, responsive design, and intuitive data exploration tools with cross-browser compatibility.

Security Vulnerability Platform (Aquila)

Cutting-edge security platform using React, TypeScript, and Redux for mobile application vulnerability identification. Features include vulnerability scanning visualization, risk assessment dashboards, and actionable security recommendations.

Cybersecurity Training Application (Castellum)

Enterprise-level application built with React featuring scenario-based learning, assessment quizzes, certification tracking, and compliance reporting analytics with responsive design.

WeHaul Logistics Platform

Lagos-based logistics startup platform offering real-time tracking capabilities built with React, featuring responsive design and optimized performance across devices.

Personal Project

Client Portal Demo – Personal Project

Tech Stack - Next.js, TypeScript, Tailwind CSS, NextAuth, React Query, Recharts, Zod, GitHub Actions, AWS Amplify

- Built a responsive client dashboard with authentication via NextAuth, protected routes, messaging, analytics, and document export.
- Implemented theming, Zod validation, and API data caching with React Query.
- Wrote unit, integration, and E2E tests using React Testing Library and Playwright.
- Configured CI/CD pipelines with GitHub Actions and deployed to AWS Amplify for production-grade delivery.

Education

PGD Information Technology - National Open University of Nigeria | Expected Graduation: 2025

B.Sc. Computer Science - University of Benin | Graduated: 2015
